AKPROX

Airkey Prox – Contactless reader unlocks more doors

Neatrol Systems   www.neatrol.com.au

The AKPROX Airkey proximity reader brings unparalleled flexibility to the Airkey suite of products. Using contactless proximity technology, the same Airkey that remotely opens gates and garage doors can now be used as a secure proximity tag all in the same package and at no extra cost. Using advanced Identify Friend or Foe (IFF) encrypted challenge and response technology, the Airkey Proximity reader now allows standard Airkeys to be used like proximity tags even if the Airkey's battery is completely flat or even missing altogether. Available in either stand alone configuration with on-board dry contact relay output or as a standard 26 bit Wiegand output format, the AKPROX range of proximity readers further cements the Airkey as one of the most advanced access control products available.

Features:

- Reliable communication with Airkey Fobs even if Airkey's battery is completely flat or missing.
- Secure IFF technology ensures only valid Airkeys are authenticated.
- No price penalty for far superior technology.

Applications:

- Contactless entry to doors and gates.
- Secure activation of equipment by authorized personnel.
- Fail safe backup for Airkey receivers should an Airkey's battery be too discharged for use as a radio transmitter.
